

Vision Statement

Bright Sparks Nursery offers care for children and peace of mind for their parents and carers. We endeavour to meet the individual needs of children and their families whilst simultaneously introducing and developing important life skills and sociability. We aim to instil a fondness for the outdoors and nourish children responsibly. We teach them how to care for and respect their environment, themselves and their property. We encourage confidence and progress through the Early Years Foundation Stage whilst sensibly addressing risk. Children are supported as they become independent. To balance, they learn the importance of team work and being dependable. We employ staff who are child centred and place importance upon the quality of education the children receive from them. Our team of staff are highly regarded and respect the views of parents/carers and children when assessing how effective their practise is in meeting the needs of our community. We recruit sensitively ensuring a dedicated team of Nursery carers keen to keep abreast of developments within the sector. In addition we exclusively employ teaching staff to support individual Pre-school children towards the Early Learning Goals. We hope our Nursery day is fun and that our staff provide good role models for the children we care for. We know that our feeder schools value our input in children's education through play and we aim to support children to become confident Foundation Stage Pupils.
